GETTING STARTED

Congratulations! This book will literally change your life if you use it!

This Book — *(Beginning with the end in mind)*

At the end of this book, you would have developed a very vital skill in finances; a basic skill billions of adults on the planet don't have—***How to read/write financial statements***. We've made is as short and graphic as possible for quick understanding and **results**! If you apply and complete the practice exercises, results are doubtless!

Practising What I Preach

Be aware: I only teach what I've achieved, and is helping others achieve. I know I can't give what I don't have. For many years, I've written financial statements. The result? I've significantly "**played my financial figures forward!**" That's the aim of this book for you too!

What You Will Gain

1. Financial Intelligence (and *be on your way to* Financial Freedom),
2. Control over your finances,
3. Use **your** financial statement to **play your financial finances forward** until your *passive* income is more than your living expenses! ($PI > E$).

Use the Workbook Provided in Section #3

A Workbook has been made available at section #3 of this book.

Use it to write your personal financial statements & track your financial progress…until your *passive income* exceeds your living *expenses* ($PI > E$)!

In this process, you will learn *basic accounting and investing! So, get a* ***pen*** *because you'll use it in the course of this book, starting from the next page.*

Get ready to shift your paradigms!

If you're ready, let's begin!

ANALYZE YOUR FUTURE

What's your financial future like?

HERE, YOU NEED TO BE BRUTALLY HONEST WITH YOURSELF. ONCE YOU *score yourself*, you'll be able to get the interpretations of the answers below. I have also added information showing what you can do once you know your result.

Self-Assessment — *(4 Quick Questions)*

1. At the rate at which you are going, using what you have as ***savings*** and ***real assets*** as a basis, in how many years would you be able to **raise 600million**?

   (1.) 0—5yrs ***(2.)*** *20yrs* ***(3.)*** *Over 30yrs* ***(4.)*** *None of these represents my answer.*

   » Guide: Don't deceive yourself. If you have saved N1,000,000 and have worked for 5years, it will take you another 500 years plus to get to 600m. It can be faster, but it's safe to be modest. We can all get it quickly by a special stroke of favour or luck. Don't count on that. *Be honest and* ***WRITE YOUR OPTION*** *below… (either 1, 2, 3, or 4)*

   ➢ _____

2. **How many Streams** of income do you currently earn from?

   (1.) Over 5 Streams ***(2.)*** *2 Streams* ***(3.)*** *1 Stream.* ***(4.)*** *No Income Stream.*

   » Guide: The number of streams of income you earn means the different sources of income you have. Do you have a job? Do you run a business by the side? Do you have Real Estate etc. *write the option corresponding to your answer below…*

   ➢ _____

3. Which of these resources do you **leverage** to make more money?

   (1.) *People force of over 500* ***(2.)*** *People force of over 10* ***(3.)*** *I exchange my time for money.* ***(4.)*** *None of the above.*

   » Guide: Some people earn by converting their time to money in a Job or as Entrepreneurs. Some earn more money from putting a lot of money to work, usually over $300,000 ($\approx N50m$). And some have an organization that has up to 500 committed staff working to achieve their set objectives. *Choose your option…*

   ➢ _____

4. Which of these terms describe best **how** you earn income?

   (1.) Passive Income (no activity) ***(2.)*** *Mostly Active Income, but some passive income from rentals, shares, businesses, etc. (Don't count if less than $100/N3500 per month).* ***(3.)*** *Active income* ***(4.)*** *I'm dependent on someone else.*

   » Guide: Passive income is income you earn residually without any present sweat or time. Active income is income that is a direct result of your use of your energy or your time. *Again, choose the option that best describes you…*

   ➢ _____

Now, add your answers together and get your total score. Then check the answers below. Try to be honest with yourself, if you are honest, then recovery is possible, if you are not, your financial future can't be helped.

Your total score: ➢ ☐

Your Score and Its Meaning

1. **less than 5** – This means you are doing well and need no help, at this stage, you should be involved in helping others.

2. **between 6—8** – This means you need a coach, *fast*, you have potentials of making it. Before you choose a coach, ensure they model your future in more than one way. Ensure their finances and one or two areas of their lives align with your future. There is no point seeking help for cancer only to end up getting AIDS.

3. **Above 9 –** This signals **DANGER**! You need urgent attention and must be willing to shut up listen and take action. Don't go to your mentor with terms and conditions, whatever you are asked to do, so far it's ethical and legitimate, do it! Learn to follow a system.

The Solutions We're Proffering

1. **If you score less than 5** — I will like you to join us in a mentoring and coaching system that allows us to help 1,000,000 families end up differently by 2025. If you have achieved your success and progress by *duplicable* means, please reach out to us, let's do this together. If you, however, achieved success by a stroke of luck (or unexplainable favour), no problem, it means you can't tell us anything to follow as you didn't follow anything yourself.

2. **between 6—8** — You need support, you need a system you can follow. Be rest assured that *I can lead anybody to a place I have been before*, and all that is required from anyone wanting to follow is ***not*** *to* re-invent my mistakes, but simply to follow in good faith, that by following they will get to the same destination. We have a mentoring system that ensures that those we have taught can teach those who are just coming behind. The motivating phrase for our objective is love, and it doesn't matter if your coach is younger or older than you, what matters is they are committed to your development and growth, and since it's a system that allows me to watch a few people's backs, while they ***pay it forward*** to watch other people's backs, we'll all still be together.

3. **Above 9**—You need to be rescued; no DEBATE! If you continue at this pace, you will find time ticking and your life advancing in the wrong direction. You need to STOP, humble yourself and submit yourself to the PROCESS. Many of us like to get to the kings' palace without getting through the servants' quarters. **PROCESS is the new RESULT!** Get HELP!

Whichever number you fall into however, you need to take a snapshot of your *current financial position*—this book will help you with that process in chapter 5: Your Current Snapshot (Read on).

1 million Financially Free Families by 2030 — *(Join us!)*

If your financial future assessment above was bad, you need to hear this:

We (at ValuePlus) are currently running with a vision to help 1million families become financially free by 2030. You can join our platform and plug into the system. I can give you some small books to read, and then appointments can be set based on when you finish reading. Based on my ability and your readiness, we will meet and I'll assign you a sponsor—someone who will be held accountable for your progress.

If you are interested in enrolling for this, signup at ***valueplus.ng/register****. Send a short message to the admin regarding your interest and someone will guide you on how to join the* ***Wealth Leadership Academy*** *(WLA).*

Financial Freedom — $(PI > E)$

Financial freedom is when your passive income exceeds your living expenses ($Freedom = PI > E$). It is not just when you can buy many things; it's when you can buy what you normally buy without having to actively work for it.

3 Things Necessary for Your Financial Future

(1.) *Your* ***current*** *financial status,*
(2.) *Your preferable* ***destination*** *status, and*
(3.) *A plan of action connecting your current, to the preferred final status.*

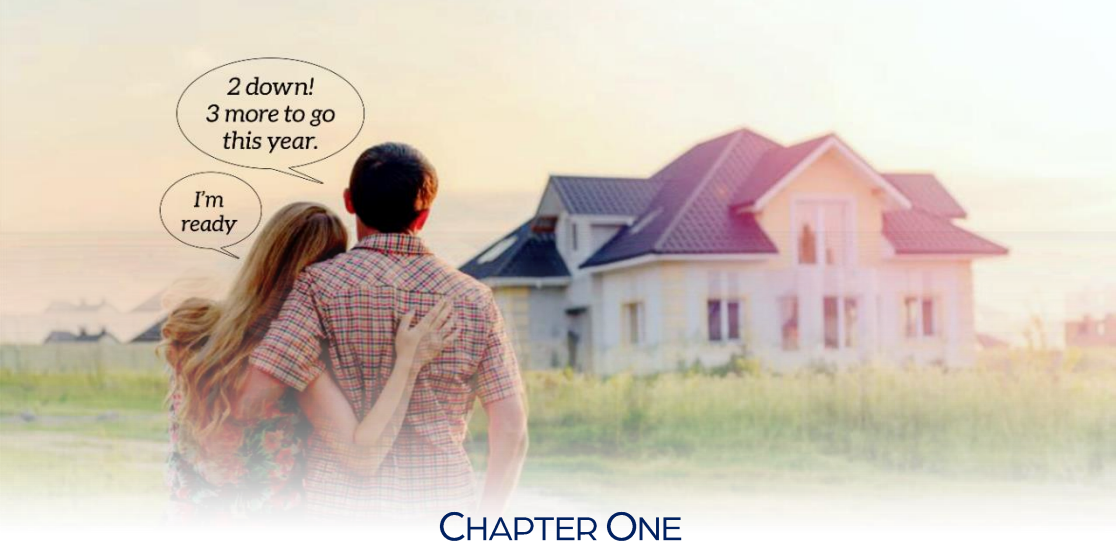

Knowing how to write your financial statement is that connecting plan of action to help you get from where you are to where you want to be. And that is what the rest of this book is about!

#1

Basic Financial Education

Once you understand the 9 stages towards financial freedom, the foundation of your financial intelligence is set!

CHAPTER ONE

FINANCIAL INTELLIGENCE

Money does not make you rich; financial intelligence does

FINANCIAL INTELLIGENCE IS THE PART OF OUR TOTAL INTELLIGENCE THAT WE USE to solve financial challenges… leading to financial freedom. (see diagram)

So, if your daily **decisions and actions regarding finances** are leading you to financial freedom (PI > E), then you're financially intelligent! If they're not, then you're *not* financially intelligent.

Academic vs. Financial Intelligence

I'm a first-class graduate with the highest CGPA in my faculty from one of the best schools in my country (Obafemi Awolowo University, Ife). By my result and otherwise, I was (and I am) academically intelligent! Plus, I even wrote the book, *"10 Laws of Academic Excellence"*. But all

these **did not compensate** for my lack of financial intelligence.

Financial Freedom

Financial freedom is the point in our lives where our ***passive income* <u>is greater than</u>** our **living *expenses***. *(see diagram)*

Freedom = *Passive Income* (***PI***) > *Expenses* (***E***)

The 5 Sources of Passive Income — *(Asset Classes)*

Things that *produce passive income* are called **assets.**

PARADIGM SHIFT #1: — *Next Money Paradigm to Shift, Page 8*

✕ ***"The things that I buy and own are my assets!"***

✓ *No. Things that yield passive income are assets. And there are 5 of them.*

#1. **REAL ESTATE:** When you build/buy a property, put tenants in it, set up a Property Management Team to manage it, and earn ***regular rent*** *(passively).*

#2. **AUTOMATED BUSINESSES:** Here, you first build a business, and then automate it—i.e. you employ someone else to run it for you. You earn the ***director's bonus*** *(passive).*

#3. **PAPER ASSETS:** You buy a "share" (as part-owner of a business; e.g. bonds, treasury bills, fixed deposits), and then share in the profit—by earning ***dividends/interests.***

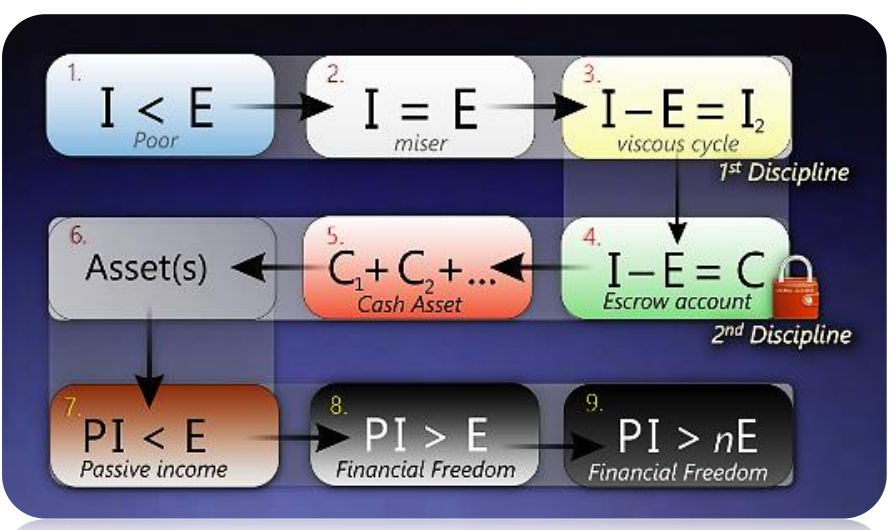

#4. **INTELLECTUAL PROPERTY:** This simply means brainwork! First, you create intellectual property (e.g. a book, song, software, script, etc. then you *license* it to a business, and you earn ***royalties*** *(passive).*

#5. **NETWORK MARKETING:** You build a network marketing (MLM) business (with 5 years of commitment), and you earn ***MLM bonuses*** *(passively).*

Play in all! We are involved in all the sources of income listed above. The bottom line is this: *"If you're not involved in any of these 5 categories, there's no passive income in view and hence, no financial freedom in view!"*

The 9 Steps Towards Financial Freedom — *(What Stage Are You Now?*

If **I** = income, **E** = Expense, **C** = Cash flow, **PI** = Passive Income, then the Process of Financial Freedom is summarized in the ***flow map*** below:

Just like the diagram on page 1, each stage explains financial behaviours.

1. I < E (**Poor**). *Income less than expenses per month. (Cash flow is negative, i.e. the person is indebted)*
2. I = E (**Poor/Miser**): *Income equal to expenses. (Cash flow is zero, i.e. I — E = 0)*
3. I > E: (**Vicious cycle**). *Income is greater than expenses. (You have extra cash left at the end of the month but is usually consumed in the next month i.e. the "change" left is not safe. And your savings = 0)*
4. I — E = C (**Cash flow**): *Funds saved into an escrow account*. We now call it cash flow (Your savings is now truly safe. Savings = +ve).*
5. $C_1 + C_2 + C_3 + \ldots$ (**Cash Asset**): *Your "savings" yield profit even while you're still saving!*
6. **Asset**: *Cash flow has grown enough to buy assets*. (e.g. Real Estate)*
7. PI < E: (**Passive Income**): *Your Assets has produced passive income* but still less than your expenses.*
8. PI > E: (**Financial Freedom**): *You've repeated the process above, and Passive Income (per month) is now greater than your living expenses. You're now financially free.*[1]
9. PI > *n*E: (**Financial Freedom Indeed**): *Passive income is* **n** *times your living expenses (e.g. Double/Triple your expenses). You're free to effectively fulfil your God-given purpose!*

"What Should I Invest In?"

Every once in a while, people as me, *"I have some money, what should I invest in?"* The first problem is that these people don't even have enough money to qualify for investment. Truth is, *"the best investments are expensive"*. I usually give them two answers…

1. Consider investing *in whatever you did* to get the money you are about to invest in the first place.
2. If something like that doesn't exist, you should invest in your FINANCIAL EDUCATION. That way, nobody will need to tell you what to invest in, *you will know exactly* what you should invest in.

---

* ***Escrow account*** *= third party savings account governed by rules such that money doesn't leave the account until the rules are met.* ***Assets*** *= any resource of value that yields passive income (any of the 5 asset classes above).* [1] ***Financial Freedom = PI > E***

Some People Should Not Be Thinking About Investing

Look again at the 9 stages towards financial freedom.
You shouldn't be thinking about investing if you're not at least stage 5, (i.e. you have accumulated enough money to acquire assets).

***Investing** means "**Buying Assets**"*

Just like the couple on page 2, financial intelligence is about taking actions to ultimately buy assets. Which stage are you now? When you identify that stage, you'll know what next you should be thinking about.

One Out of a Hundred!

Years back, 100 people (at age 25) on a career path till 65 (in America) were studied. At 65, it was found that…

- ***54 of them were** financially **dependent***
- ***16 were still working***
- ***24 were dead***
- ***5 were** financially **independent***
- ***1 was financially FREE!***

This means that if you pick any 10 people at random, 5 of them would end up being financially dependent. The odds are stacked against you and you need to fight hard to achieve financial freedom!

Financial Independence vs. Financial Freedom

By proxy, I've gone through *three* business schools. And none of them mentioned anything about *passive income* or *financial freedom* (PI > E). They taught me how to build a business into *an idea* and increase *active income* (*which is good)* but nothing about generating passive income streams.

Earning from *a business you run* is financial independence (i.e. you're not dependent on anyone else but yourself for you and your family's sustenance). However, **earning from your *investments*** is financial freedom.

CHAPTER TWO

HOW TO GENERATE INCOME

The best way to increase your income is to increase your capacity

Value Out = Cash In

FIRST, BURY IT IN YOUR MIND THAT "*MONEY SHOULD ONLY come into your hands after you've given out* ***value!***" *(see diagram).* There's no such thing as *something for nothing.*

*The key to earning anything is "**trade**" or "**exchange**".*

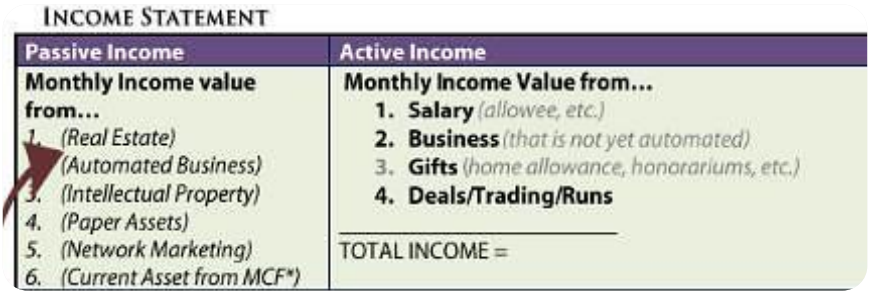

Either you're offering a ***product*** or ***service*** *via your skills, etc. or* ***information*** *(data—e-books, audios, etc.).* But there must be "trade". It's *value* for *cash*! Nothing more, nothing less. We would have cheated you if the value you're getting in this book is not equal to (or more than) the cash you paid for it. *"Money is either created or earned" (Dr. Sunday Adelaja).* And, *more value out = more cash in!* Someone once defines…

$$Wealth = \boldsymbol{V} \times N$$

Where ***V*** = ***value***, and *N* = the *number* of people you exchange the value with.

The 5 General Ways to Earn Money

These are the 5 income sources that feature in the *income column of* your financial statement. The first 4 are active income streams. The 5th is passive.

INCOME STATEMENT

Passive Income	Active Income
Monthly Income value from… 1. *(Real Estate)* 2. *(Automated Business)* 3. *(Intellectual Property)* 4. *(Paper Assets)* 5. *(Network Marketing)* 6. *(Current Asset from MCF*)*	**Monthly Income Value from…** 1. **Salary** *(allowee, etc.)* 2. **Business** *(that is not yet automated)* 3. **Gifts** *(home allowance, honorariums, etc.)* 4. **Deals/Trading/Runs** TOTAL INCOME =

1. **SALARY**—i.e. you work for a business and you're paid at the end of the month. The challenge here usually is that you sacrifice your time in the process. And a wrong mindset about money could be formed. (e.g. *"I'm getting richer when my salary increases", or "…when I get a high-paying job".*)

PARADIGM SHIFT #2: *— Next Money Paradigm to Shift, Page 15*

× ***"My Financial Goal is a** high-paying job"*

✓ *Your financial goal should be Financial Freedom (PI > E)!*

2. **GIFTS**—Allowances (from parents or husband/fiancé), Honorariums for Speakers, Ministers, Pastors, Entertainers (or comedians), etc.

3. **DEALS:** Trading (Buying & Selling), Referrals, Rentals, Exchanges, etc.

4. **BUSINESS** *(or Entrepreneurship)*: You create your *own* product/service, employ employees to sell, pay them a salary, and profits from net sales.

5. **INCOME FROM INVESTMENTS** (or passive income): They are *income from assets.* This is by far the best way to earn. It's the income that sets free: e.g. Rent, Dividends, Director's bonus, Royalties and MLM Bonuses.

Here are 6 simple ideas for generating income.

1. Develop a Skill and Offer it as a Service

Typing, Teaching skills, Graphics/Web Design skills, Catering skills, People Management Skills, Leadership Skills, etc. It takes doing something repeatedly without interruption for 30 days to turn it into a habit/skill. But guess what? *Once you develop the skill, it becomes yours—forever! And you can take it wherever you go!* It's amazing! I have goals for *many more* skills to develop!

2. Write a Book About Your Area of Expertise

This is one of the ways to duplicate your results in others, and profit from it. You profit financially by helping other people achieve what you've achieved. If you've had some measure of success, help others. And guess what? You'll be thanked for it and your name can be remembered for good. I did!

3. Save up to Buy Things You Can Rent Out

The word "**rent**" is a very important word in the school of Financial Intelligence. It must become a major part of your vocabulary. Rent says, "*Use this for a period of time, pay me for it…and RETURN IT*". Rental income is *leveraged income.*

Like we still do at ValuePlus, you can rent out Projectors and Screens, Modems, Generators, Musical Instruments, Events instruments (Lights and Sounds), Cameras, Chairs and Canopies, Cooking Utensils, etc. You only need to look at your environment to see what has rental value!

4. Do a Part-time Job — *(Start a business by the side)*

Except the business is ready to pay you HEAVILY, I do *NOT* recommend a full-time job. The challenge I have with it is that *it stands in your way* of being able to do other important productive things—like *building extra income streams, personal/skill development, attending seminars, taking/seizing opportunities,* etc. But a part-time job gives you extra hours to do so. (If a full-

time job) you should at least ensure you have about *2 days off in a week—so you can spend extra hours for extra income or personal development.* Examples:

a.) Part-time teaching/working

b.) Jobs involving shifts (preferably half-day), etc.

5. Referrals

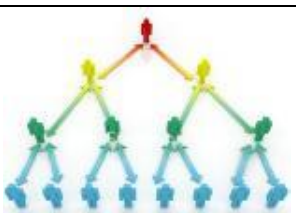

The key word here is "*leverage*" (i.e. other people's resources, etc.). "Referrals" involve *leveraging* on the skills, talents, experience, time, etc. of your friends (or your network) to earn some income. You can do this by referring people to them and collecting your *share*.

It's like this: If someone comes to me and wants to design a website, I can tell him to hold on. Then call a friend of mine who designs websites that I have a job for him. Then ask for my percentage. And then link the two of them together. Finish! Once the deal is done, I collect my share! So, you qualified to be paid because you were the one who "*made the deal happen*"! This is the *concept* Network Marketing is based upon. Network Marketing is also called "*Referral Marketing*".

You can earn from our referral system at MyFund. Simply sign up at valueplus.ng/register, and go to the ValuePlus menu. Or message the admin about it and someone will show you how to earn via referrals on MyFund.

6. Start a Network Marketing Business

Contrary to many people's scepticism, Network Marketing is real and it *works*! It's been predicted to be *The Business of the 21st Century*. <u>It is a way in which a company sells its product DIRECTLY TO CONSUMERS through *relationship referrals.*</u> The customer becomes the distributor.

It gives you the necessary education/training/personal development you need to be able to get even more results. It helps you to develop fantastic relationships. I recommend the company I'm part of. I recommend *MyFund.*

MyFund

MyFund is a financial intelligence app that allows you to grow your funds (or save) and acquire assets (or invest) with ease.

1. Grow your funds to millions
2. Earn from referrals/products
3. 1-year Financial Intelligence
4. Acquire assets (invest)

It's beyond a piggybank. What differentiates it from others is the continuous training/education that goes with it. That's why we're not just a fintech but an **edufintech** platform.

Continuous Learning Increases Your Earning Ability — *(Join the WLA)*

As an edufintech platform, MyFund provides continuous training for users via the Wealth Leadership Academy. The more you learn and practice, the more you develop the capacity to earn.

Financial Freedom by 2030 — *(Join us)*

We're currently running with a vision to help 1million families become financially free by 2030. For details and to be a part of this, reach out to us (*tolulope@tolulopeahmed.com or deolu@deoluakinyemi.com).* We'll support you, or assign a coach to you.

Question — *(Write down your answer)*

What will you do with your time and life if you earn enough passive income that covers all your expenses?

It's the same question as "**What's your purpose in life**?" What will you spend the rest of your life doing when you're financially free? Think about it.

CHAPTER THREE

CASH FLOW & THE ESCROW ACCOUNT

To get passive income, you need assets. To get assets you need an escrow account.

Quick Definitions

1. **CASH FLOW** (*OR MONTHLY CASH FLOW*) = *"AMOUNT OF money you remove (from income) & save first, BEFORE spending on other monthly expenses."*
2. **ESCROW ACCOUNT** = *"a third-party savings account governed by rules (such that you cannot make personal withdrawals except withdrawals to acquire assets)."*

Rules Governing the Escrow Account

1. You *must* save (the cash flow) in the account **every month** without fail.

2. You cannot withdraw the money except in pursuit of an asset (which by definition, generates passive income)
3. Your saving should be yielding some interests/dividends for you *while you are still saving* (we call it "Cash Asset" if it yields while saving)

To Gain Your Savings, You Must Lose Control Over it!

King Solomon says, "*As wealth increases, so are* ***the people*** *that will come and eat it,*" (Ecclesiastes 5:11). This is called *Parkinson's Law* in economics, which states that: "*Expenses will always rise up to meet income*". Whether you earn a few thousands per month or you earn in millions, your expenses will rise to that level. Like they say, *"there's a devil for every level."*

This is why the **escrow account** (for example, MyFund) is very important. The account allows you to *lose control over your savings* so that you will have it. But if you hold on to it, *Parkinson's Law* is likely to catch up with you and you will lose it.

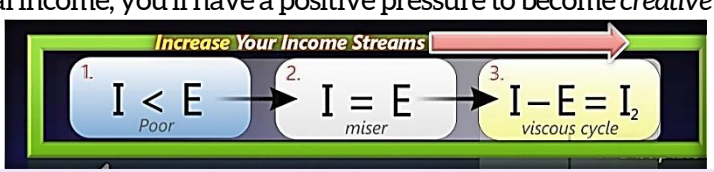

"He that loses his life for my sake will have it; and he who holds on to his life will lose it" (Jesus, Matt. 16:25).

Most people will never be able to grow their funds without the help of an escrow account. So, let me sound it *very unequivocally* again here,

You need to get an ESCROW ACCOUNT today! Go to valueplus.ng/register

"I Need to Increase My Income Streams"

I tell people, *"when you make your escrow savings a priority (via autosave or otherwise), the first thing you'll realize is that* ***your income is not that big, and you need to increase your income streams".*** Once your savings reach 50% of your total income, you'll have a positive pressure to become *creative* again.

Generally, you'll move faster through the stages if you increase income streams.

Don't Deceive Yourself, N5000/month is just N300,000 in 5 years

This almost goes without saying. But if you don't have large *reserves*, you're likely not going to have *assets* soon.

The best investments are expensive. Don't deceive yourself. If you save N5000/month, you'll only have N300,000 in 5 years. To reach N1million in 5 years, you'll have to save an average of N20,000 per month.

The Aim is to Save Half Your Income Monthly for Investment

You can start small by saving 20% but the target should be 50%. This will…

1. allow your funds in escrow to reach the millions fast.
2. help you do multiple investments in a year.

Millions in Escrow Forces You to Recognize Opportunities

Also, the ideas that can enter your head is dependent on the size of cash you currently have access to. **For example**, imagine two people drive into a Petrol Station, one asks for the price of petrol, the other is thinking and asked for the price of the Petrol Station. It's because he's seeing opportunities!

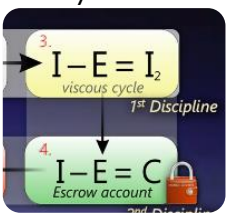

6 Key Lessons

1. ***You Can Open an Escrow Account RIGHT NOW!*** Yes, you read that correctly. **MyFund** is a classic example of an escrow account you can use. (You can go now to valueplus.ng/register). It's good to have an accountability partner *(a coach, a mentor, your spouse, fiancé/fiancée, friend, etc.)* so you can always update yourself of your savings progress.

2. ***"Autosave" is the New "Save".*** Most people never learn the greatest lesson about savings: ***"You don't save what is left; you save from source".*** In order to do this, you need to use the autosave feature of your account (except for those who are very disciplined of which most people aren't). This allows you to save before you spend on any of your expenses in the month (or week). This is how you *"pay yourself first!"* This

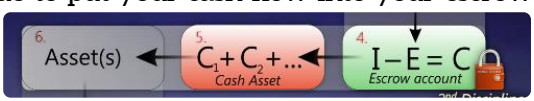

gives you an inner feeling knowing you have something in your "storehouse". And makes you be unafraid of "debt"! And guess what? *"God commands His blessings upon your storehouses"* (Deut. 28:8).

3. ***Your Real Savings:*** Until your savings (or cash flow) are in your escrow account, your savings are **not yet safe** from you. Neither is it safe from the pressures from your friends, family members, etc. If your savings are in a savings account with the ATM card in your hand, your savings are NOT safe **yet**! (Except you put it in your escrow account — out of *your* own destructive reach or spending grasp).

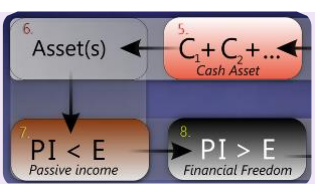

4. ***Prioritize***. Manage your monthly expenses with the amount left after you've forwarded your cash flow into your escrow (manually or via autosave). It's important to take care of basic needs like food, transportation, communications, etc. first, before others. (see page 28).

5. ***Repeat the Process.*** Continue to put your cash flow into your escrow account…until it's big enough to buy a *passive-income-generating* asset(s).

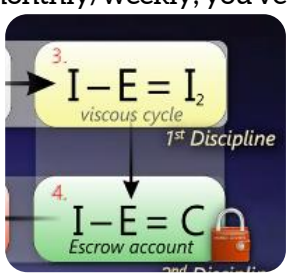

6. ***Repeat the Whole Process.*** Repeat steps 1 – 5 until your passive income is more than your living expenses. Once this happens you're financially free!

Summary — *(Cash flow Must Go Into The Escrow Account)*

If your monthly/weekly savings go to your escrow monthly/weekly, you've moved to **stage 4** of the financial freedom flow map.

A separate chapter was made for the escrow account because *most people never open one* — they never get to stage 4. But you can get this level right here, right now via the MyFund app online.

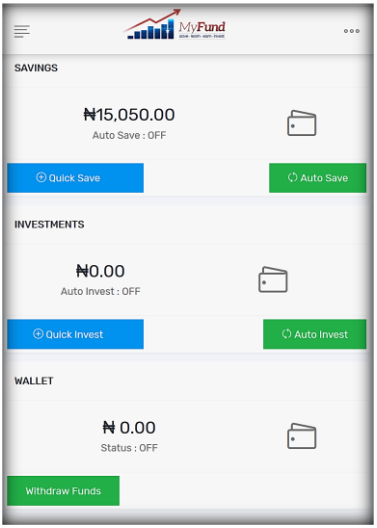

I'm so happy when I receive messages from those I've helped to set one up. We have a system that can help *anybody* get to stage 4. The following section is the solution we're proffering.

MyFund — *(Our Escrow Account)*

MyFund is opened to **everyone**. To be a part of it, you simply need to register at valueplus.ng. *(MyFund gives you access to all ValuePlus products and services).* MyFund gives you access to 3 different accounts:

1. **Savings,**
2. **Investments**, and
3. **Wallet**

Savings — *the benefits*

1. ***Develop Saving Culture***: Save monthly, minimum of N5000/$15
2. ***Qualify for a loan:*** after six months.

Investments— *the benefits*

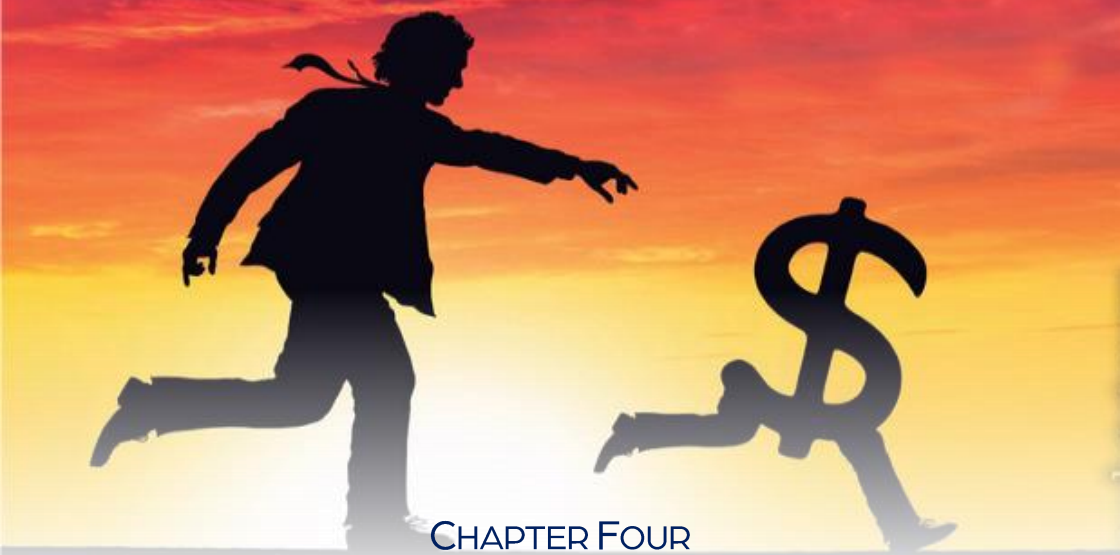

1. ***Develop Investment Culture***: Invest multiples of N60,000/$160
2. ***Earn Dividends***: up to an *amazing* 20% *dividends* per year! Receive up to 10% of your total investment every 6 months—January and July.
3. ***Ready for Asset***: Accumulate funds towards acquiring solid assets.

*The first discipline in finances is to **save** (develop a saving culture). The second is to **invest** what you saved. Then the **reward** comes (Dr. Sunday Adelaja)*

PARADIGM SHIFT #3: *— Next Money Paradigm to Shift, Page 20*

✕ ***"I'm making progress financially because I'm saving consistently!"***
✓ *Don't just save; INVEST! Money cannot be stored. It must be put to use!*

Jesus teaches that if your money is just lying down buried in an account without yielding some dividends, you're losing it (Luke 19). Don't let it happen to you!

CHAPTER FOUR

GAINING CONTROL OVER YOUR FINANCES

Whatever is not captured on your budget should not happen in your expenses

Orderly Debt Repayment Plan

ONE OF THE KEY THINGS THAT KILL PEOPLE IS *DEBT*. PEOPLE HAVE the wrong strategy for debt: *the good people want to pay it all at once; the bad people don't want to be reminded and dodge.* Both are wrong!

What **the law** requires is that *"a debtor must **acknowledge** he's owning and **willing to** repay"*. Once you know this, you should create an *"Orderly Debt Repayment Plan"—either weekly, monthly, bi-monthly, quarterly, etc.* Once you do this, you can clear all your debts without stress and with the serenity of mind.

You may even write a note to your creditor informing him of this plan. E.g.

Dear _____,

As you know, I owe you $_____, and I intend to pay you in full, (plus interest). I've been planning for it. So, I have opened a kind of "Debt Clearance Account" (DCA), and 20% of my income is going directly into that account. I plan it this way because it actually gives me balance.

Each week (or month) you will be paid $_____ from my "DCA," until you're paid fully. I believe you understand. I am quite excited about this new plan myself. Thank you in advance for your kind cooperation.

Have a wonderful day!

Michael Ogunmuyiwa.

Understand that this note/letter to your creditor is a **statement of fact** and not a request—it is **you** who is **in charge** of your finances, **not** your creditors! If you can, send this note/letter with the first "plan payment".

Realize there is an "outside chance" that some unreasonable person will not want to cooperate with you. They might even go so far as to phone you and attempt to intimidate you with **threats** of taking you to court, etc. But please **hold your ground**, because there is no court/law in the country that would not congratulate you when you explain your entire plan for Financial Independence. Moreover, you will find that 95% of the people, to whom you write, will be most cooperative.

Now give yourself a good "pat on the back," because as of this moment, you are well on your way to starting a completely new way of life!

3 Things to Control First on Your Financial Statement

ITEMS TO CONTROL	CONTROL MEASURE
1. Income	***Increase*** *your income*
2. Expense	***Manage*** *your expenses*
3. Cash flow	***Maximize*** *your cash flow*

Yes, you must always seek to **increase** your income streams. **Manage** your expenses (not reduce or live below your means. Don't be a miser. Instead, *expand* your means by *increasing your income and managing your expenses).* If you do this well, you'll be **maximizing** your monthly cash flow.

5 Quick Tips for Controlling Your Finances

1. ***Pay Yourself First***: i.e. before all else, make your priorities your *first* expenses. This includes your monthly cash flow *(forwarded to an escrow account)*, Some key investments. It's about your future! Budget the rest. Don't be too quick to pay off your debts first. No. Pay yourself first! Then follow the Debt repayment plan. You will be pressured to increase your income.

*When you pay yourself **first**, you will realize that your income is not that great. Then you'll experience **more** positive pressure to increase your income streams!*

2. ***Have Realistic Budgets:*** Cut unnecessary expenses.
3. ***Make Progress with your Cash flow:*** What makes writing the financial statement fun is that *your monthly cash flow is positive*. Channel it to your escrow. That's progress. And that's what will keep you excited to write it consistently! Reward yourself when you make progress!
4. ***Postpone whatever is not captured on the budget.*** Defend the budget!
5. ***Don't forget key elements in your budget:*** Weekly budget, monthly budget, quarterly, annually, discretional, unexpected, etc. E.g. Is there a group you're committed to? Renewals? Etc. They shouldn't catch you by surprise. Plan, prepare and budget for them.

Gaining Control Over Your Expense Column

There are about **30 things** we generally spend money on. The items in **bold** are for people who are not yet married with kids and other responsibilities (e.g. Students, graduates, etc.).

Unbudgeted Expenses	Budgeted Expenses	
10% of Budgeted expenses:	1. Rent	**17. Internet/Communication**
	2. Children's School Fees	**18. Health and Beauty Care**
	3. Children's Expenses	19. Home Appliances and Maintenance
	4. Fuel—Car and Generator	20. Projects Business Expenses
	5. Transportation	21. Entertainment
	6. Food and Beverages	22. Clothes, Shoes, Bags, etc.
	7. House Help, Nanny, Gateman & Driver	23. Vacation
	8. In-laws and Outlaws	24. Car Maintenance and Fees
	9. Security Deposits	25. Community Fees: LASTMA, etc.
	10. PHCN and Utility bills	26. Insurance
	11. Gifts and Appreciation	27. Seeds
	12. Tithes, Offerings & Special Offerings	**28. Savings** *(CashFlow = Escrow)*
	13. Books and Personal Development	29. Emergencies and Opportunities
	14. Recharge Cards	30. Miscellaneous
	15. DSTV	
	16. Outstanding Debts, Loan & Mortgage	
	TOTAL EXPENSES =	

Write Out This List

Write out these 30 things and paste them where you can always see them (if you're reading this as an ebook). If you're with the hardcopy, you'll find workbook in the third section of the book that'll help you use this list. It will **guide you** each week/month you write your financial statement. This will be explained in later chapters.

Calculate Your Average Expense per month — *(What is it?)*

The average human being does not know how much he/she expends per month. Not you! With the list above, calculate your average monthly expense.

3 Ways to Gain Control Over Your Finances:

1. Plan for Unbudgeted Expenses — *(Make it 10% of your Expenses)*

The place where you begin to gain control over your expenses is with your "unbudgeted expenses". Make it a percentage (say, 10%) of your budgeted expenses.

When you plan for unbudgeted expenses, then they become less unexpected.

(Such unexpected expenses include: the breakdown of your car or pumping machine, loss of your phone, etc.). Yes, these things are not expected but they happen. Planning for them in advance gives you more control over your expenses.

2. Learn to Say "No"

Learn to say "**no**" to friends, families, and even yourself. Listen, "Money is discipline!" This is because if you don't discipline yourself to say "no", you might as well be saying "no" to your future—your freedom.

This means potentially, you're saying "no" to millions of people that your freedom will save in the future!

PARADIGM SHIFT #4: *— Next Money Paradigm to Shift, Page 29*

- ✕ ***"My financial problems are my enemies!"***
- ✓ *The problem is your inability to say NO to the financial demands from others and even yourself!*

King Solomon says, *"As wealth increases, people suddenly increase to eat it"*. (Ecclesiastes 5:11). Aka PARKINSON'S LAW.

This is why Wallace Wattles said that the first way to reduce poverty in your environment is to **ensure** you are not poor yourself! The principle is this:

"Whatever is not on your budget should not happen in your expenses".

I'm not saying *"don't be nice"*, I'm saying *"plan for niceness"*—be in control! If you have to compromise, then you should also give up some other expenses on your budget list for it. Don't lose control of your finances!

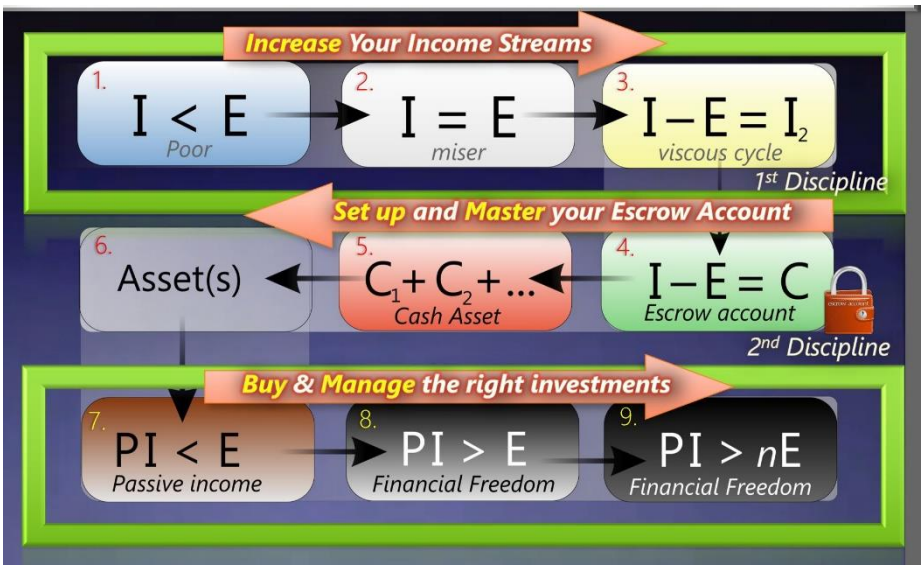

3. Use Your Escrow Account

As explained before, the escrow account is a **third-party savings account governed by rules** such that money doesn't leave the account except in pursuit of an asset (which by definition, generates passive income). This one step alone has made all the difference in people's financial lives! It will for you

as well. *If you get an escrow account because of the book, trust me, it's worth more than the cash you paid for it!*

Advancing Through the Stages

The first 3 stages of the freedom flow map require that you *increase your income streams and manage/control expenses.* Between 4—6, you *manage your escrow & cash flow*. In the final 3 stages, you manage *assets & passive income.*

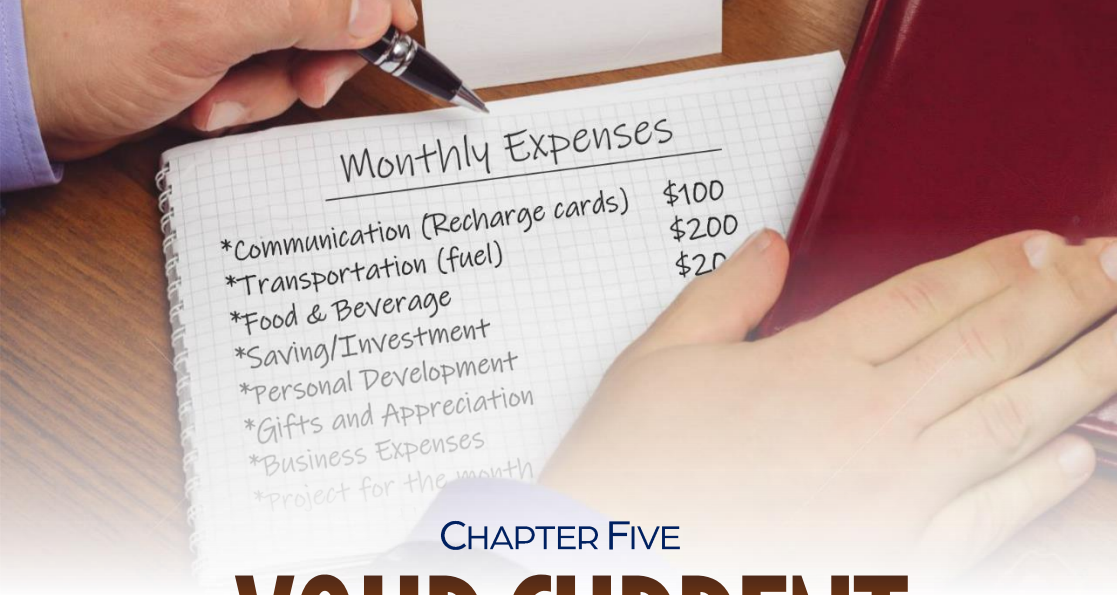

Now, Let's Review What You've Accomplished so far…

1. You have the foundation for financial intelligence by understanding the 5 sources of passive income and willing to acquire assets to earn them. ✓
2. You're in at least stage 4 of the financial freedom map because you have an **escrow account** (with MyFund or otherwise) that helps you pay yourself first *(positive cash flow via autosave every month).*
3. You're getting ready to acquire solid assets soon. ✓
4. You have an Orderly Debt Repayment Program *(Control over Expenses).* ✓
5. And you have at least 50% of your income to live on. ✓
6. Your mind is **clear** *(of debt or otherwise)* to carry on with the powerful ideas (and practices) coming your way in the remainder of this book. ✓

#2
Creating Your WealthMap

Wealth is simply ***an exercise in numbers****.*
Once you've developed the thought-processes, habits and behaviours of the rich, you've qualified to call yourself wealthy!

CHAPTER FIVE

YOUR CURRENT FINANCIAL STATUS

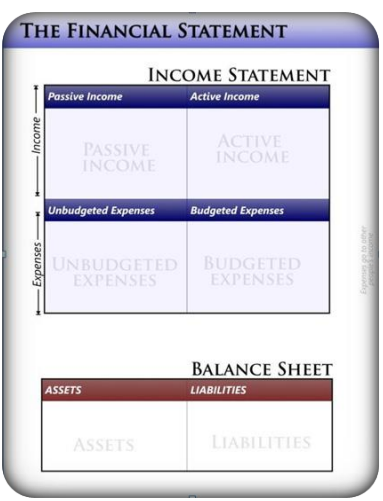

Billions of adults can't write their personal financial statement. Not you!

Your New Report Card

Your **PERSONAL FINANCIAL STATEMENT** IS your "Report Card" after you leave school.

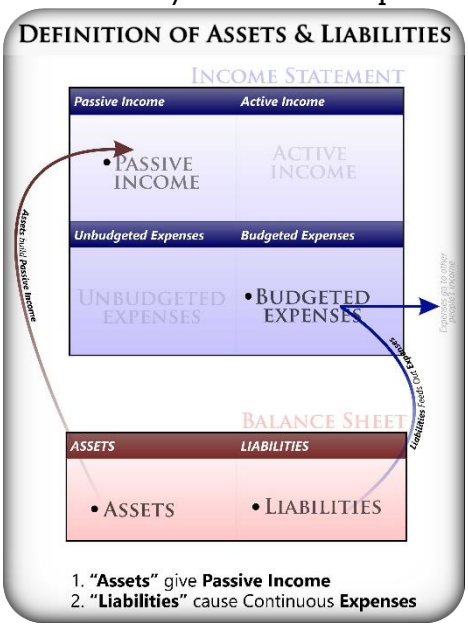

*Your report card (CGPA, %, etc.) is what tells you your "**Status**" in school. Your financial statement tells you your **"Status" in life**.*

This world is *financially calibrated*: *meaning* underneath everything we do, is *cash flow!* And the ***numbers tell you the real thing*** going on in your life; because the numbers do not lie!

Your #1 Pre-requisite For Financial Intelligence

The most fundamental requirement for you to become financially intelligent is **the ability to write financial statements**. If you follow the process contained in this book, you will be able to do just that.

Change Your Paradigm!

Financial Statement is BETTER than your ***Academic Résumé!***

It was a paradigm shift for me to move my attention away from my "Academic Resume/CV" (first-class result) to "My Financial Statement". *"Your financial statement is your report card once you leave school"* (Robert Kiyosaki).

Your Financial Statement

The financial statement consists of 2 main elements: **"The Income Statement"** and **"The Balance Sheet"** (as shown in the diagram above).

- The INCOME STATEMENT is divided into two: the "**Income Column**" and "**Expense Column**" (as shown). The Income Column is *further* divided into two: "**Passive Income**" and "**Active Income**" while the "**Expense Column**" is also divided into "**Budgeted Expense**" and "Unbudgeted Expense".
- The BALANCE SHEET contains Your "**Assets**" and "**Liabilities**" (as shown).

The "Income Statement-Balance Sheet" Relationship

This relationship is actually the simple **definitions** of assets and liabilities.

Never forget the statements and diagram above: The arrows show the way money flows on your Financial Statement. We call it "Cash Flow Diagram".

1. *By definition*, your "**Assets**" produce your "**Passive** Income" *(and there are actually 5 classes: Real Estate, Paper Investments, Automated Businesses, Intellectual Property, & Network Marketing).* Passive income is an effect, a harvest, or a yield.

2. *By definition*, Your "**Liabilities**" cause "**continuous expenses**" (as shown). E.g, your loans, mortgages, children, rented apartment, etc.

Your Current Financial Status— *(Elements of the Financial Statement)*

1. EXPENSE COLUMN:

This is where all the things you spend money on go (at the beginning of the month before you make those expenses). *There are about **30 things** we generally spend money on (as shown).*

xpenses	Budgeted Expenses	
eted expenses:	1. Rent	**17. Internet/Communication**
	2. Children's School Fees	**18. Health and Beauty Care**
	3. Children's Expenses	19. Home Appliances and Maintenance
	4. Fuel—Car and Generator	20. Projects Business Expenses
	5. Transportation	21. Entertainment
	6. Food and Beverages	22. Clothes, Shoes, Bags, etc.
	7. House Help, Nanny, Gateman & Driver	23. Vacation
	8. In-laws and Outlaws	24. Car Maintenance and Fees
	9. Security Deposits	25. Community Fees: LASTMA, etc.
	10. PHCN and Utility bills	26. Insurance
	11. Gifts and Appreciation	27. Seeds
	12. Tithes, Offerings & Special Offerings	**28. Savings** *(CashFlow = Escrow)*
	13. Books and Personal Development	29. Emergencies and Opportunities
	14. Recharge Cards	30. Miscellaneous
	15. DSTV	
	16. Outstanding Debts, Loan & Mortgage	
	TOTAL EXPENSES =	

Monthly Cash Flow

➢ **UNBUDGETED EXPENSES** (expenses you can't plan for)**:** Make your unbudgeted expenses about **10%** of your "budgeted expenses". This gives

you some **CONTROL OVER EXPENSES**! This accounts for "expenses you cannot predict", e.g. your health suddenly fails, your pumping machine suddenly breaks down and needs fixing, you lost your phone, etc. If "Budgeted expenses" = $20000, then your unbudgeted expenses = $2000

TOTAL EXPENSES = BUDGETED EXPENSES + UNBUDGETED EXPENSES

Quick Exercise

Using the list above as a guide, calculate your **average expenses** per month right now!

2. INCOME COLUMN:

Broadly Speaking, we have 4 categories of active income streams and 5 categories of passive *(including your cash asset, as shown below):*

Passive Income	Active Income
Monthly Income value from…	**Monthly Income Value from…**
1. *(Real Estate)*	1. **Salary** *(allowee, etc.)*
2. *(Automated Business)*	2. **Business** *(that is not yet automated)*
3. *(Intellectual Property)*	3. **Gifts** *(home allowance, honorariums, etc.)*
4. *(Paper Assets)*	4. **Deals/Trading/Runs**
5. *(Network Marketing)*	TOTAL INCOME =
6. *(Current Asset from MCF*)*	

TOTAL ACTIVE INCOME = SALARY + BUSINESS PROFIT + GIFTS + DEALS/TRADING/RUNS

PASSIVE INCOME = RENT + DIRECTOR'S BONUS + DIVIDENDS + ROYALTIES + MLM BONUSES

- **PASSIVE INCOME** = Income figures from your assets. Remember the definition diagram above: "**Assets**" produce "**Passive Income**". Observe that *the arrow in the picture above comes from the asset column.*

MONTHLY CASH FLOW = TOTAL MONTHLY INCOME — TOTAL EXPENSES

Quick Exercise

Using what you've learned so far, calculate your *average* **Monthly Income** and your monthly **Cash Flow**! Is it positive, negative or zero?

3. BALANCE SHEET:

Balance Sheet: Shows your "**Assets**" and "**Liabilities**"

Asset	Liabilities
1. Real Estate 2. Automated Business 3. Intellectual Property 4. Paper Assets 5. Network Marketing 6. Current Assets (From MCF*)	1. Debts 2. Loans: Repayments, Mortgages

*MCF = Monthly Cash Flow

NETWORTH = *ASSETS* — *LIABILITIES*

Follow the model above and write YOUR OWN FIGURES for next month.

Wealth is Measured in "Time"

$$Wealth = \frac{Passive\ Income\ +\ Active\ Income}{Expenses/month}$$

(measured in time—months)

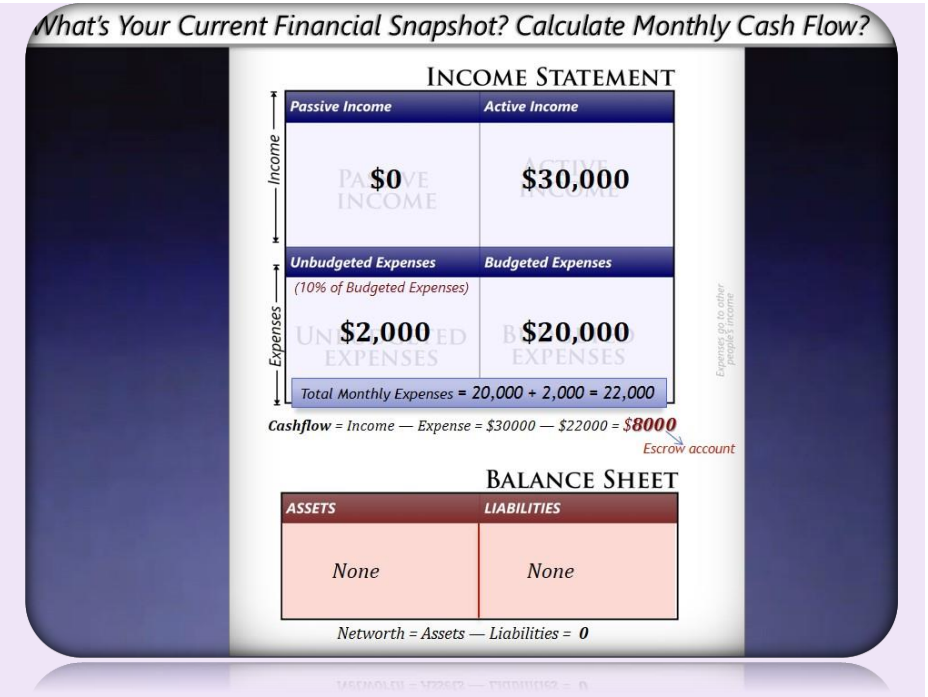

Wealth = *"how long you'll survive financially if you stop working."*
Financial freedom gives you *Time Freedom!* When your PI > E, you qualify to retire. The purpose searching question is *"What will you spend that time doing?"*

Important Points to Note

1. Write your financial statement ***before*** the month begins. Travel through the month in your mind's eye and calculate your cash flow.
2. Your Monthly Cash Flow, must be removed and saved first **before** you spend on any other expense for the month.

Putting it all Together — *(Put Your Monthly Cashflow in Escrow Account)*

Perhaps the *most important element* on your financial statement each time you write it is your "**Monthly Cash Flow**" or *Escrow Savings*. If you're reading this, it's assumed you already have one (with MyFund or otherwise).

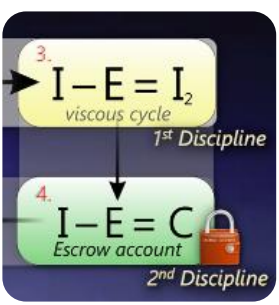

$$MCF \text{ or } Cashflow = \$3000 - \$22000 = \$8000$$

PARADIGM SHIFT #5: — *Next Money Paradigm to Shift, Page 39*

✕ ***"How Much I Earn is Important!"***

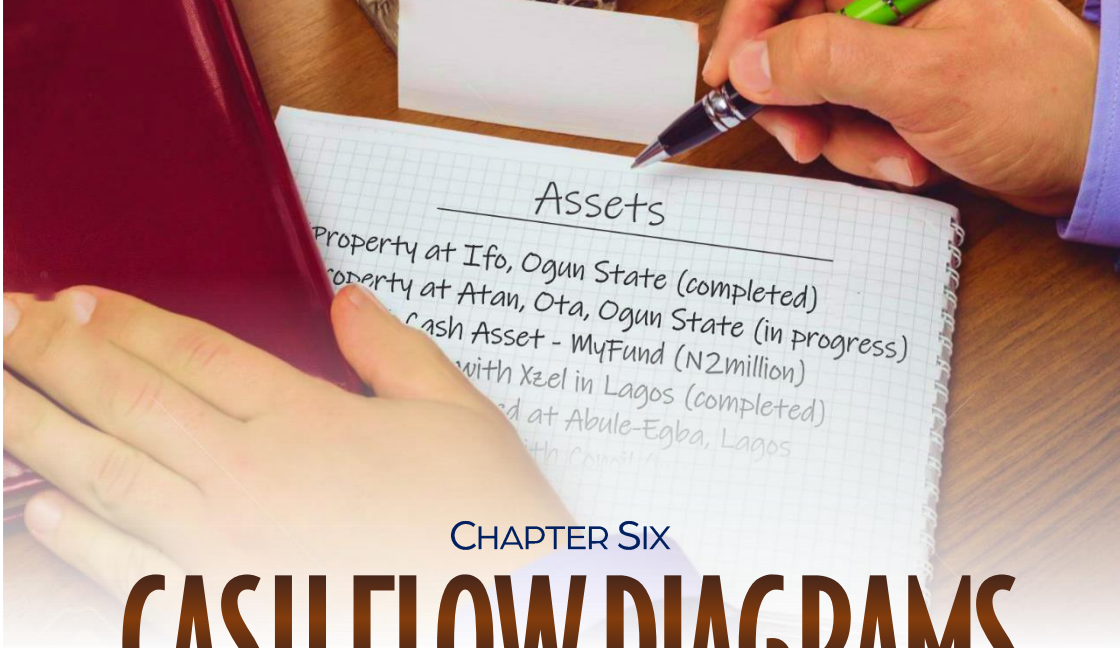

✓ *No! What is important is how much is LEFT! i.e. positive monthly cash flow*

For the example in the diagram above, the Monthly Cash Flow = $8000. You make progress towards acquiring assets by always channelling this amount into an "**escrow account**" *(a savings account governed by rules such that money only leaves the account in pursuit of an asset).* You can use the MyFund app. Simply go to www.valueplus.ng/register to begin.

Quick Action Steps

i. What's Your Current Financial Snapshot? Use the space provided in the workbook section of this book to calculate your current financial snapshot.
ii. Write Your Financial Statement for **next month**. What's Your Monthly Cash Flow? *(Again, use the space provided in the workbook section—page 40).*
iii. Give thanks to God for every positive cash flow! *Every time!*

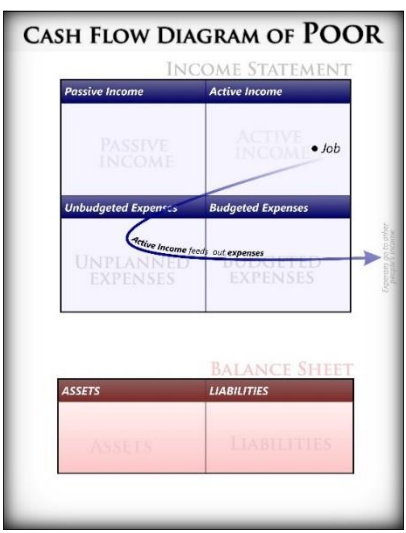

CHAPTER SIX

CASH FLOW DIAGRAMS

You have the right to call yourself wealthy once you understand how the rich think.

Cash Flow Diagram

THE CASH FLOW DIAGRAM IS BASICALLY THE SAME AS THE FINANCIAL STATEMENT but with arrows ***showing how cash flows*** in your life. You may not be able to see quick changes in your financial statement but with your cash flow diagram, you can notice every little financial progress/behaviour!

The Poor's Cash Flow Diagram

The Poor **earns to spend**! And they usually spend more than they earn. Their income is either less than or equal to their incomes per month.

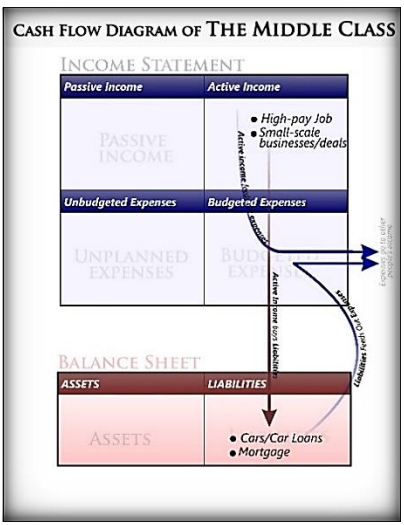

Money comes in usually actively (via the job/business) and goes out as expense **and never comes back in**. (as shown).

On the Freedom Flow Map…The poor lives between *Stages 1 and 2 or 3*.

The Middle Class' Cash Flow Diagram

The Middle Class earns high but they convert the income left (I_2) to another income to be **consumed** (Stage 3). "No **escrow account**, no future!"

Typically, they buy liabilities

Because the middle class earns high, they want to *look like the rich*, so they buy luxuries (cars, expensive clothes, gadgets, etc.). However, the rich never spend. *They invest their income and live off the overflow—the yield.*

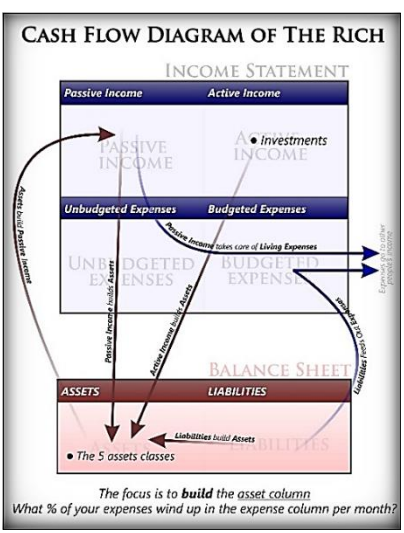

There is he that makes himself rich yet has nothing. And there is he that makes himself poor, and yet has great riches" – Solomon, Proverbs

The Rich's Cash Flow Diagram

The rich convert their active income to assets as **quickly** and **efficiently** as possible.

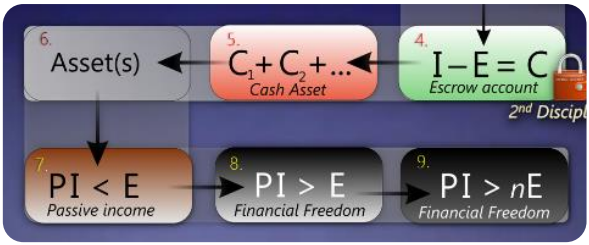

The focus is on the Asset Column

Using the escrow account, their funds accumulate in pursuit of assets! Assets yield passive income which takes care of their living expenses.

They even take loans to acquire more assets. This is called *"good debt"*.
The rich have the right behaviours, directing all funds to acquire assets!

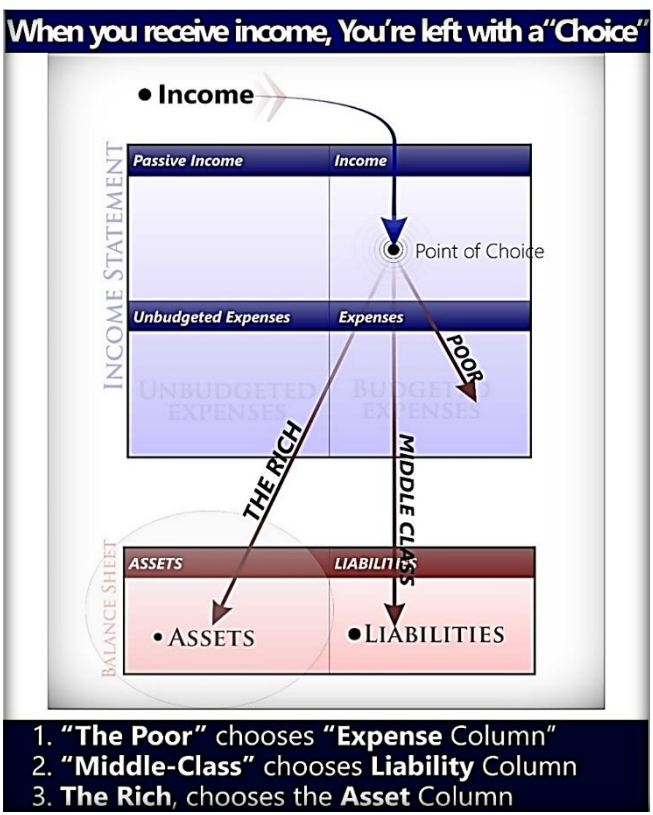

QUESTION:
"What percentage of your money going out as expense winds up back in your income column by month end?" (Rich Dad)

The Choice — *(Summary of the Cash Flow Diagrams)*

If you paid attention to the cash flow diagrams above, you'll notice that "Where you end up is totally **your choice**". When you receive income (whether salary, business profit, deals, gifts/honorariums, investment income, etc.), you are left with a **choice:**

1. You either just spend most of it. *(i.e. choose the **expense** column)*
2. or use most of it to buy luxuries/doodads (***Liabilities***)
3. Or save most of it in your *escrow* towards getting solid **assets** ✓

*"Only 10% of wealth creation is in **earning it** (income column); while 90% of wealth creation is about **how you spend it** (choosing asset column)."*

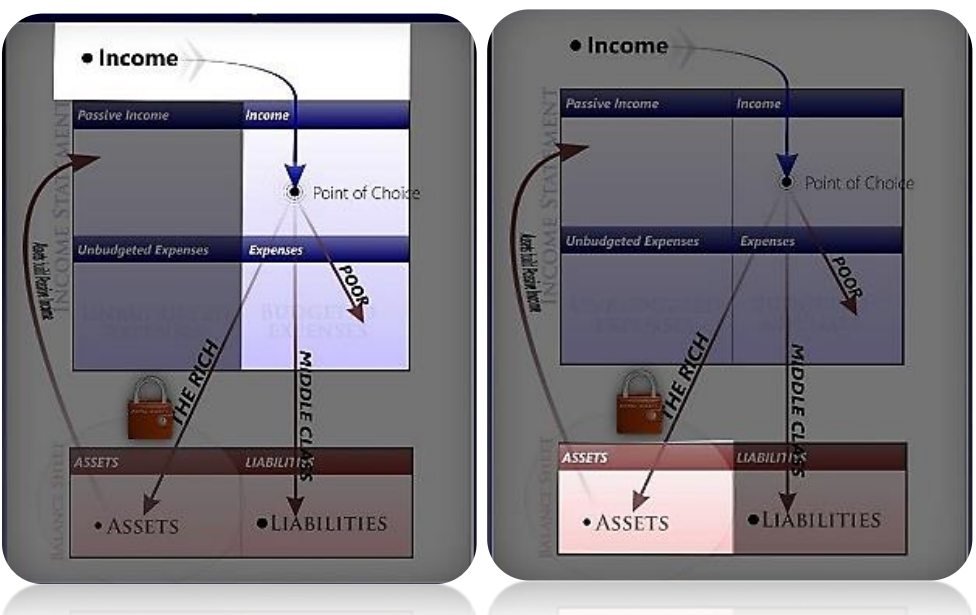

That's why we stated earlier that the first secret to financial prosperity is "CONTROL OVER YOUR EXPENSES" (*i.e. the control over how you spend).*

AGAIN: *"What percentage of your money going out as expense winds up back in your income column by the end of the month? (Rich Dad)*

Nobody was born rich, middle-class, or poor. You were born to make choices that will determine whether you're rich, middle-class, or poor. Decide! This book teaches you to prioritize your *decision* for building your asset column (see picture above). Once you've developed the thought processes, habits and behaviours of the rich, you have earned the right to call yourself *"wealthy"*!

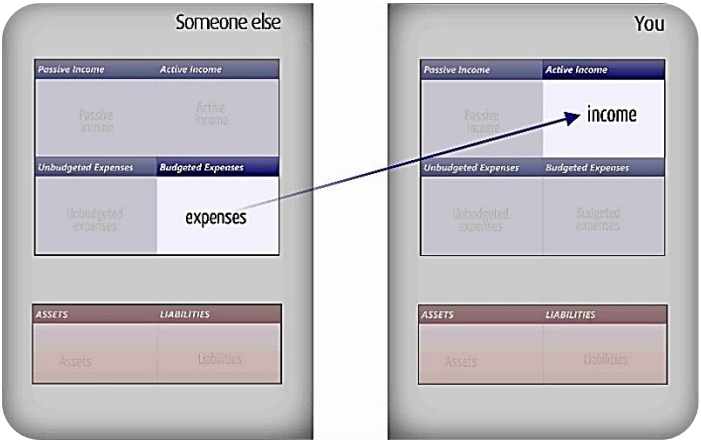

Wealth is in The Asset Column

Most people *(the poor)* spend their lives within the *income-expense* column. They *"earn to spend"*. But wealth is not in the income column; wealth is in the *asset column*. Wealth is not in *active income; it's* in *passive* income *(which is a harvest from your assets, as shown below).*

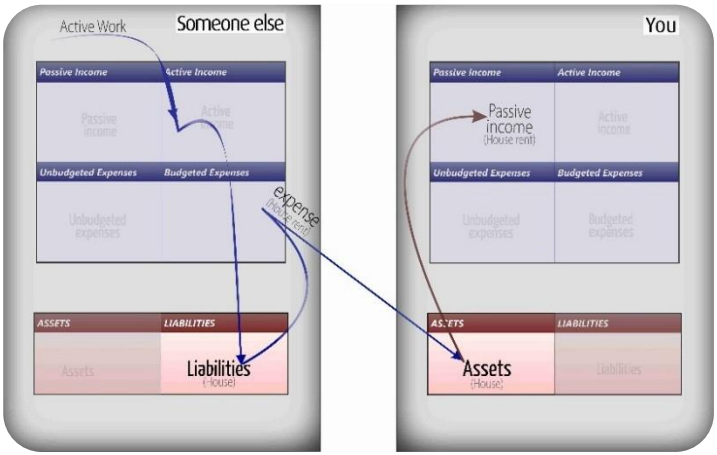

Your Income is Someone Else's Expense

Your income is someone else's expense (& vice-versa). You can't have one without the other. It takes at least two financial statements to see the big picture *(diagram)*. Every time I earn, it's because someone else made an expense. That's why *your ability to **sell** (i.e. offer more value) is still the most important skill in business today!* When you *sell*, someone else spends and you earn!

Your Asset is Someone Else's Liability

In my house, my tenants pay *rent* continuously *(liability)*, while I collect **the** rent as passive income. The same house—their liability, my asset. *(diagram)*. In summary, all activities should be focused on developing your asset column.

CHAPTER SEVEN

YOUR FIVE-YEAR GOAL

Wisdom is the natural manifestation of long-term thinking

Creating Your WealthMap Today

I TELL PEOPLE, *"WHEN YOUR LONG-TERM GOALS ARE CLEAR, YOUR SHORT-TERM decisions will become more accurate."* Biblical wisdom is **foresight**. Imagine 5 years from now, you have developed the habits and behaviour of the rich, and you have *built* your asset column. Write it down today. Use the guide that follows.

You cannot experience a future you cannot see!
The future belongs only to those who have been there before!

Remember in chapter 5, when calculating your current financial status, we started with the expense column. But in creating your WealthMap (*your 5-year financial goal)*, let's start with **the asset column** of your balance sheet—*because that's where the focus should be.*

Your Five-Year Goal — *(Five years from now)*

1. Asset Column — *(Populated)*

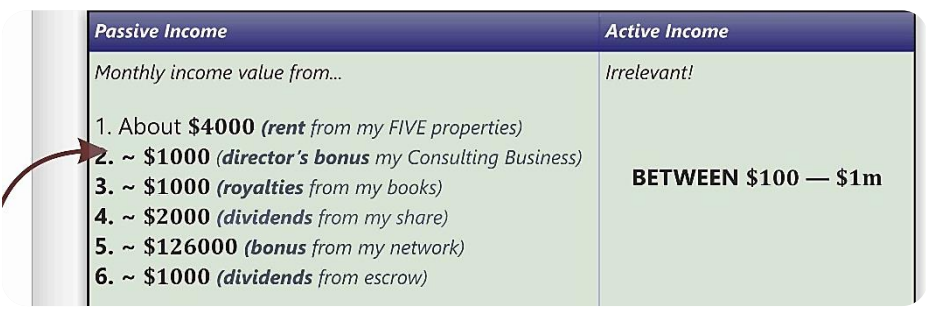

The *most important column* in the financial statement is the asset column. The celebration at the end of the year should be about the asset(s) you were able to buy during the year. This column is responsible for your passive income.

According to the Cushion Principle, even though it's a 5-year goal, you have to aim to achieve them in less than 3 years. If that time is not realistic for you, then you should perhaps set a 10-year goal and work to achieve them in 5 years. It took me more than 5 years to acquire my first property investment.

2. The Income Column — *(High Passive Income)*

Five years from now, visualize your passive income as a multiple of your living expenses ($\boldsymbol{PI} > nE$).

Write down only what you're willing to work hard to get! What are the activities producing the said income? What systems would have been built to make it a reality?

3. The Expense Column — *(Covered by passive income)*

The Expense Column (five years: Covered by Passive Income)

You want your expenses to be low and less than your passive income.

Unbudgeted Expenses	*Budgeted Expenses*
LOW	LESS THAN PASSIVE INCOME

Putting it all Together — *(Your 5-Year Goal)*

5 Years From Now...

INCOME STATEMENT

Passive Income	*Active Income*
Monthly income value from... 1. About **$4000** ***(rent** from my FIVE properties)* **2. ~ $1000** ***(director's bonus** my Consulting Business)* **3. ~ $1000** ***(royalties** from my books)* **4. ~ $2000** ***(dividends** from my share)* **5. ~ $126000** ***(bonus** from my network)* **6. ~ $1000** ***(dividends** from escrow)*	*Irrelevant!* **BETWEEN $100 — $1m**
Unbudgeted Expenses	***Budgeted Expenses***
LOW	**LESS THAN PASSIVE INCOME**

Assets build Passive Income

BALANCE SHEET

ASSETS	*LIABILITIES*
1. **FIVE** Properties up for Rentals *(Real Estate)* 2. **Automate** my Consulting Business *(Auto. Business)* 3. **TWO** of my books as bestsellers *(Intellectual Property)* 4. **Shares** in FIVE companies *(Paper Assets)* 5. **Bonuses** from **my Network** *(Network Marketing)* 6. My Current **Cash Asset** *(in Escrow Account)*	1. Debts *(Good Debt)* 2. Loans/Repayments **PLANNED!** *(covered by passive income)*

God's desire for you is to Earn Passive Income

You need to understand the scriptural concept of *"...the tree planted by the rivers of waters whose leaves are always green, whether rain or shine. Whatever he does prospers!" (David, Psalm 1:1—3).* The rain represents temporary/active income while the river beside it represents constant/passive income. Listen,

God does not expect us to spend our income;
*but the **yield** from the investments we make with our income (Luke 19).*

You can be financially free in 5 to 10 years if you apply the teachings of this book or join us at www.valueplus.ng and work together with friends. And hear this: you don't require more physical or hard work:

PARADIGM SHIFT #6: *— Next Money Paradigm to Shift, Page 40*

× ***"If I WORK HARDER and make more money, I'll soon become free!"***
✓ *No! Hard work or Money won't make you rich. the key to Financial Freedom is Financial Intelligence—knowing and applying the laws of money*

Money won't make you rich because it was not meant to do so. You must first be rich in inner values (wisdom, knowledge, understanding, intelligence, skill, leadership, strategy, business, etc.) before money can come to you.

Help Come When You Already Know Where You're Going

Don't set your 5-year goal by just multiplying your current reality by 5. No. Interrupt the flow of things and jump into the future and great a big reality that pulls you towards it. If you don't know where you're going, you don't qualify for help. Also...

If you've not asked for HELP recently,
it's because you're not venturing into anything beyond yourself.

Your Reticular Activating System (RAS)

*Your RAS is an automatic mechanism in your **brain** that **filters** important information into your attention towards the achievement of your goal(s).*

For example, if I ask you: "*In the last 7 days, how many **red** cars have you seen?*" Your answer might probably be "*none*" or "*I can't remember*", etc.

But if I had said to you 7 days ago: "*Let's see how many red cars you will see in the next 7 days*", you will suddenly realize that as soon as you step out into the streets, when *any* red car passes, *you'll immediately notice it*! Why? Because as you see it, your RAS calls them into your attention. The point is this: your RAS will only function towards achieving the goal you have been *preconditioned* with.

Now that you've created your 5-year goal, you'll begin to recognize opportunities you naturally would not have paid attention to. And you will meet with success in uncommon hours.

Again, we have a **system** that aims to help 1million families be financially free by 2030. Go to www.valueplus.ng. If your goal is clear and you need help to get there, reach out to us, we'll either guide you or assign you to a coach. Let's succeed together—all can be wealthy!

PARADIGM SHIFT #7: — *Next Money Paradigm to Shift, Page 44*

✕ ***"Human needs are plenteous, hence we can never have enough money."***

✓ *Economics is not all true! There's abundance in the world. All can be wealthy.*

Economics teaches scarcity, but financial freedom is about abundance.

Quick Exercise

1. Using the guide above and the space provided *in section 3 (page)*, **Create** Your 5-year Financial Goal!
2. Place it where you can always see it…*until you think & act in terms of it most of the time.*

After you've done the above exercises, **give thanks** to God every day for it and see how you'll keep experiencing things that will make you continue giving thanks!

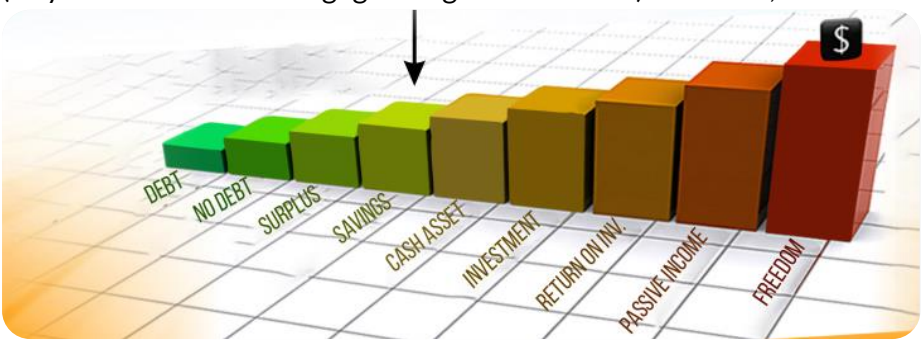

CHAPTER EIGHT

USING YOUR FINANCIAL STATEMENT

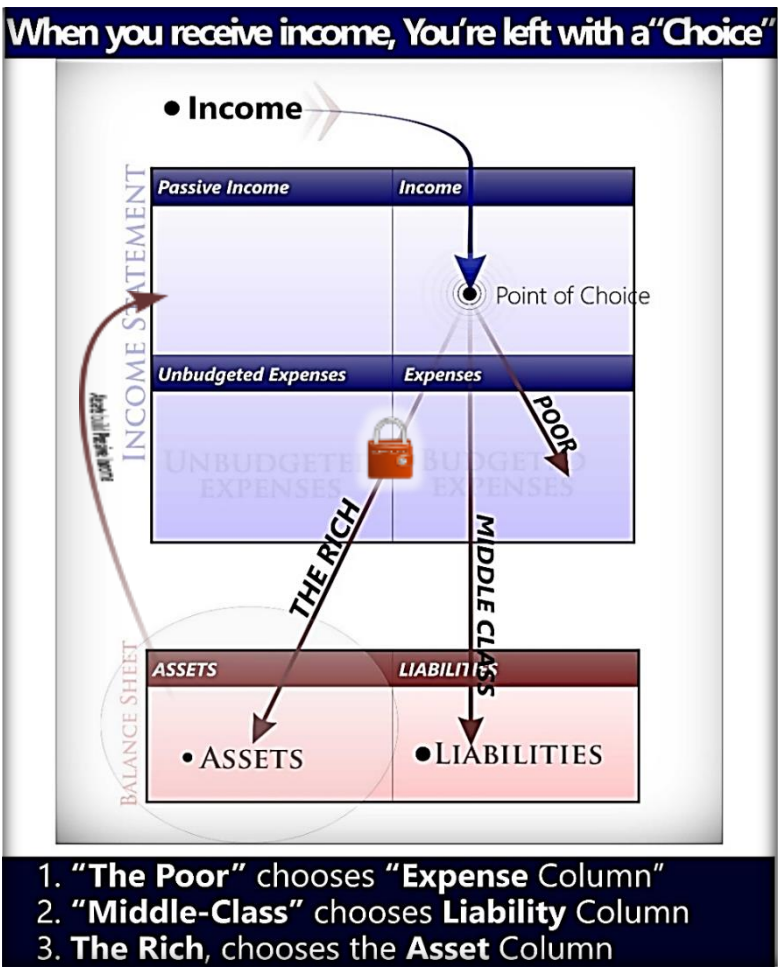

How to Play Your Financial Figures Forward

Playing Your Financial Figures Forward

IF YOU'RE READING THIS, I'LL ASSUME YOU'RE IN AT LEAST STAGE 4 OF THE 9 STEPS (i.e. you at least have savings growing to the millions). However, in order to

really monitor your progress, you need to track it with your financial statements. Section 3 will help you do that. The first discipline in playing your financial figures forward is deciding to prioritize your ***escrow account*** (thus your ***asset column***),

Remember, *"how much you earn is not important; what's important is how much is LEFT—your cash flow or escrow savings"* (Paradigm #5). The figures on your financial statement are what shows you how much progress you're making towards your financial freedom goal. It's how you play your financial figures forward:

The Numbers Don't Lie

See, you need to like *numbers*. Successful people consider the numbers—Facts, figures, details, and fragments—because the numbers don't lie. The numbers show the true financial progress of your life.

The financial statement is like *superman's x-ray vision*: It helps you see what's truly going on beneath your (or any other person's) financial life. It shows you whether or not a person is in control of his finances. Most importantly it helps you **make more accurate short-term financial decisions**. For example, *seeing that my budget for gifts/appreciation for the month is exhausted before the middle of the month, I'll postpone all benevolent gift to the next month (even when I have some available funds).*

You can use the financial statement to analyze a business, a piece of real estate or even a country's finances.

"Understanding how to write financial statements is still one of the key skills for an employee (or self-employed person) to move to the Business (or investment) quadrants of the cash flow quadrant" (Robert Kiyosaki).

Writing Your Financial Statement is the Link

There are 3 things necessary for your map:

1. A starting point (your current financial status)
2. A destination (your five-year goal), and
3. A plan of action connecting start to end (your financial statement).

That's exactly what *writing your financial statement is*—the connecting link between your current financial status and your 5-year goal. Use the spaces provided in the workbook to write your financial statements and track your financial progress! If you're not yet a member, join the Wealth Leadership Academy (of MyFund) to see live examples of how this is being done.

PARADIGM SHIFT #8: — *Next Money Paradigm to Shift, Page 43*

× ***"I don't like numbers. I'll simply focus on achieving financial freedom."***

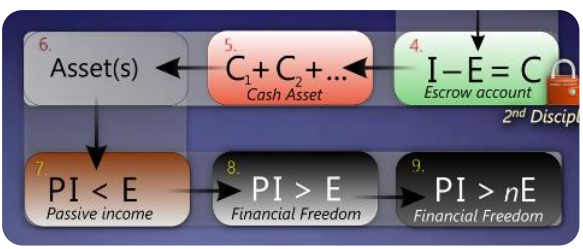

✓ *You have to succeed on paper before real life. You can only achieve financial freedom by PLAYING YOUR FINANCIAL FIGURES FORWARD*

Expect Coincidences

When your goals are clear, (i.e. when you think/talk in terms of them *most of the time)*, your RAS will filter opportunities in your consciousness. You'll literally experience *clicks, connections, coincidences, and more cash flow*.

Finally, Let Your Business Buy Your Assets

When you get to stage 5 or 6 (i.e. ready for assets), *let your business buy the assets*. This limits your liabilities. That is why a registered business is called a limited liability company. Investing as an individual is for average people.

"The worst way to invest is to invest as an individual (RISKY). The best way to invest is to have your business buy your investments." (Robert T. Kiyosaki)

Again, Let's Review What You've Accomplished

1. **You know where you are financially:** You know your current financial status and where you are on the 9 stages towards financial freedom. ✓
2. **You've created your Financial Freedom goal.** And it's placed where you can always see it (e.g. a vision board). ✓
3. **You're making financial progress:** You're not only saving per month (via MyFund or otherwise) but also writing financially statements weekly/monthly in order to make more accurate financial decisions. ✓
4. **Escrow is growing/yielding!** You are increasing the streams of your income. So, your cash reserves *(cash asset)* is growing weekly/monthly

(and yielding dividends while you're still saving). And it's getting bigger for the purpose of acquiring *passive-income generating assets.* ✓

5. **You're learning how to invest!** Via the Wealth Leadership Academy (or otherwise), you're learning how you'll soon manage your investments. ✓
6. **You are acquiring assets.** There is a Success Cycle: it's a motivation cycle. Once you succeed in something, your motivation and belief system goes up. Once you acquire your first *passive-income generating asset,* it'll be easy for you to acquire several others. ✓

Conclusion

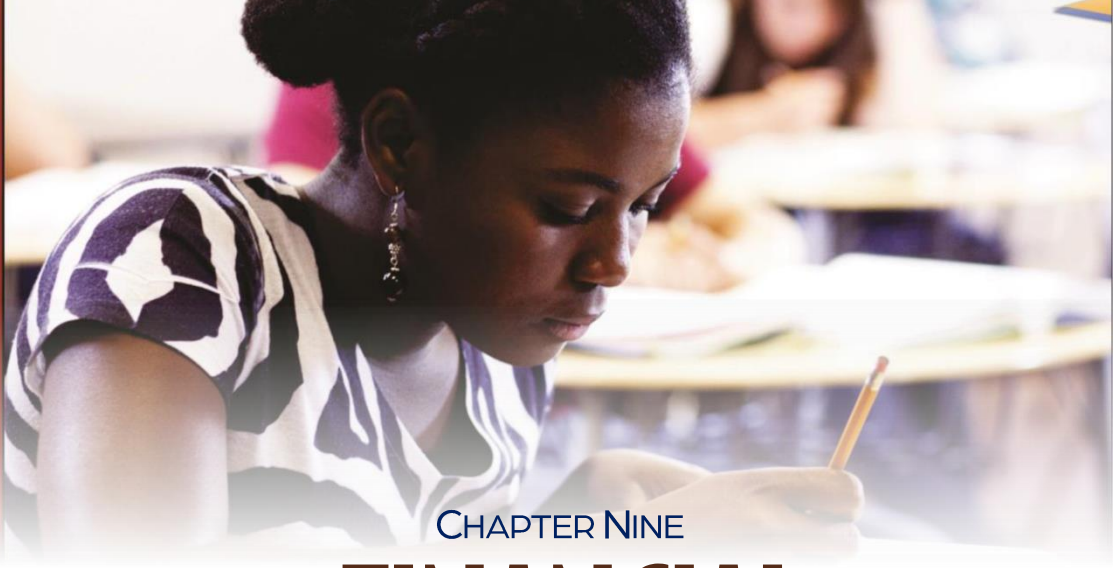

The goal is **financial freedom**. There are **9 stages** to get there. Financial freedom is when your passive income is more than your expenses.

To achieve financial freedom, you need passive income. To get passive income, you need assets. To get assets, you need cash assets (Cash Flow). To get this, you need Escrow Account.

*THE **ONLY** WAY TO TRACK THIS PROGRESS IS WITH A FINANCIAL STATEMENT.*

This book has given you that edge. If you've done what this book suggested, you have earned the right to be called "wealthy"

Up next is a free financial intelligence assessment test!

CHAPTER NINE

FINANCIAL INTELLIGENCE EXAM

If you score 100% at your first trial, then what you need is to win the Cash Flow Game

Multiple Choice Questions (MCQ I)

1. Which of the following actions is a passive income deal?

(A.) I buy shares at ABCBank when it is low, and sell when it is high.
(B.) I've written books, other publishers including amazon.com are selling it & I'm paid royalties per month.
(C.) I bought land at Abuja and sold it a few months later at 500% profit!
(D.) I get 40% the payment when I refer people to my friends who do web design.

2. An **escrow account** is…

(A.) A current account
(B.) A savings account where you can save per month

(C.) A third-party savings account governed by rules such that funds are released only when in pursuit of assets.
(D.) None of the above

3. Monthly Cash flow (MCF) and Networth (NW) are expressed as…
(A.) MCF = Income — Expenses; NW = Assets — Liabilities
(B.) MCF = Income — Expenses; NW = Assets — Passive Income
(C.) MCF = Passive Income — Expenses; NW = Assets + Passive Income
(D.) MCF = Income — Expenses; NW = Assets + Passive Income

4. The following are rules that govern the escrow account except
(A.) The savings should yield some interest/dividends while you're still saving.
(B.) You can only withdraw money from the escrow for a business generating great profit
(C.) You must save every month without fail!
(D.) Withdrawals happen only when the money is in pursuit of passive-income generating assets.

5. The following are true except
(A.) God's will for us is to be financially free so that we can effectively serve the needs of the kingdom.
(B.) God doesn't expect us to spend our income. He expects us to spend the yield from the investments we make with our income.
(C.) God naturally blesses us with more when we are faithful with our resources (demonstrate financial intelligence)
(D.) Human needs are plenteous and the resources of the world are limited to meet them

6. Which of the following demonstrates financial intelligence?
(A.) Spending as the income comes; put in the effort to ensure it doesn't finish quickly.
(B.) Writing financial statements monthly and ensuring positive cash flow for escrow
(C.) Spending all your income to ensure your income is equal to expenses (I = E) per month (no borrowing).
(D.) Spending all your money on charity.

7. Which of the following does not demonstrate financial intelligence?
(A.) Ensuring that whatever is not captured in your budget doesn't happen in your expenses.

(B.) Saving in an account that yields no interests/dividends
(C.) Removing your priorities (escrow, tithe, investment) first before spending on any expenses in your financial statement.
(D.) Increasing income streams, managing expenses and maximizing cash flow

8. What is financial freedom?
(A.) When a person earns millions of dollars per month
(B.) When one's passive income is equal to or greater than his living expenses
(C.) When one does not have any money at all (i.e. the person is free of money)
(D.) When one retires

9. What is the financial statement?
(A.) A strict report/budget of all the income and expenditures
(B.) A way to balance your financial accounts
(C.) A proactive way to take control of your finances and make financial progress
(D.) A statement containing the records of how money is being spent.

10. Which of the following ideas is not correct?
(A.) 10% of wealth creation is about earning income. 90% of wealth creation is determined by how you spend it.
(B.) More money, hard work and savings are not the keys to financial freedom but financial intelligence
(C.) Economics is not all true, economics studies scarcity, but financial intelligence is about abundance
(D.) As a parent, I should be able to depend on my children when I'm old having invested in them when they were young.

Multiple Choice Questions (MCQ II)

11. Which of the following actions is a passive income deal?
(A.) I buy shares at ABCBank when it is low, and sell when it is high.
(B.) I've written books, other publishers including amazon.com are selling it & I'm paid royalties per month.
(C.) I bought land at Abuja and sold it a few months later at 500% profit!
(D.) I get 40% the payment when I refer people to my friends who do web design.

12. Which of the following ideas is not correct?

(E.) 10% of wealth creation is about earning income. 90% of wealth creation is determined by how you spend it.
(F.) More money, hard work and savings are not the keys to financial freedom but financial intelligence
(G.) Economics is not all true, economics studies scarcity, but financial intelligence is about abundance
(H.) As a parent, I should be able to depend on my children when I'm old having invested in them when they were young.

Theory

1. (a.) Explain concisely each of the 9 steps to financial freedom.
   (b.) Imagine you're financially free right NOW while reading this, what will you spend with the rest of your time and life doing?

2. What stage are you currently in the 9 steps to freedom? What is your financial intelligence rank now? And how long will it take you to get to step 9? Write it down right where you are, right now!

Answer Keys

1. B	4. B	7. B	10. D
2. C	5. D	8. B	
3. A	6. B	9. C	

#3

Playing Your Financial Figures Forward

Use this section to practice writing your financial statements

Financial Statement Workbook

(Use this section to practice writing your financial statement)

Again, the elements of the financial statement are shown below. Use it as a **guide**. The following pages provide a *workbook*. Use it to play your financial figures forward towards your goal. Also, recommend to friends!

Passive Income	Active Income
INVESTMENT INCOME 1. *Rent* 2. *Dividends* 3. *Dir. Bonus* 4. *Royalties* 5. *MLM Bonuses*	1. Salary 2. Deals 3. Business 4. Gifts

Unbudgeted	Budgeted Expenses	
(10% of Budgeted)	1. Rent 2. Children's Sch. Fees 3. Children's expenses 4. Fuel—*for car, generator* **5. Transportation** **6. Food and Beverages** 7. House help/Nanny/Gateman/Driver 8. In-laws and outlaws 9. Security Deposits 10. Utility Bills 11. **Gifts and Appreciation** **12. Offerings/Special Offerings** **13. Books/Personal Development** **14. Recharge Cards/BIS/Internet/Communication** 15. DSTV/Cable TV 16. Health and Beauty Care	17. Home Appliance & Maintenance 18. Business Expenses 19. Entertainment **20. Other Savings/Investments** 21. Things: Clothes, Shoes, Bags, etc. 22. Vacation 23. Car Maintenance/Fees 24. Community Fees, LASTMA, etc. 25. Insurance 26. Seeds 27. Emergencies, Opportunities 28. Miscellaneous 29. Etc.

Average Total Expense = Budgeted + Unbudgeted Expenses

Monthly Cash Flow (escrow savings) = Total Income — (Avg.) Total Expense

Assets build Passive Income

Assets	Liabilities
1. Real Estate 2. Automated Business. 3. Paper Assets/Investments 4. Intellectual Property 5. Network Marketing (MLM) 6. *Current Cash Asset*	1. Mortgages 2. Car loans

Net worth: (Assets — Liabilities) =

My Current Financial Snapshot

(Use previous page & chapter 5 as a guide to calculating your current financial status)

Passive	Active Income
	Salary: Deals: Business: Gifts
Unbudgeted	**Budgeted Expenses**
(10% of Budgeted)	
Monthly Cash Flow (escrow savings) =	

Assets	Liabilities
Networth (Assets — Liabilities) =	

My 5-Year Goal

(Use the guide from chapter 7 to set your 5-year goal)

So, it's 5 years from now: Year _____ ? How many assets have you acquired? And what's the corresponding passive income from them? How much do you to have as *reserves* in your escrow account? Fill it below.

Passive	Active Income
Unbudgeted	**Budgeted Expenses**
Monthly Cash Flow (escrow savings) =	

Assets	Liabilities
Networth (Assets — Liabilities) =	

My 1-Year Goal

(Use the guide from this book to set your 1-year goal)

Your year starts the day your vision for the year is set. For most people, that day is *NOT January 1st*. Begin your year with the end in mind!

At the end of this year, what's your income target? How many assets this year? How much do you expect to have in your escrow account? Fill!

Passive	Active Income (Income Target)
	Salary: Deals: Business: Gifts
Unbudgeted (10% of Budgeted)	**Budgeted Expenses**
Monthly Cash Flow (escrow savings) =	

Assets	Liabilities
Networth (Assets — Liabilities) =	

Monthly Targets and Reports

In the following pages, you'll see financial statements for monthly/weekly targets, and *the corresponding reports.* This allows you to always aim to *increase your income, manage expense and maximise cash flow* every week/month.

At the beginning of the month (or week), set your *income and cash flow targets;* then **when the month** (or week) **ends**, use the report page to write how far you've made progress.

Notice, you'll need to hold this book with you throughout the year!

Starting Requires Strength, Continuing is Easy

The energy it takes to *start running* is more than the energy it takes to *continue running.* Writing your first financial statements may seem difficult, but you get better as the days go by.

Making your first million is the hardest, but once you put your energies into ensuring you make the first one, it becomes easy to acquire several other millions. Earning your first passive income could be the most difficult; but once you make your first, it becomes easy to make many others.

Fin. Statement/Targets for January

(Set the targets for next month! What's your cash flow?)

Aim to have cash flow every week. What will it be by month end?

Passive	Active Income
	Salary: Deals: Business: Gifts
Unbudgeted	**Budgeted Expenses**
(10% of Budgeted)	
Monthly Cash Flow (escrow savings) =	

Assets	Liabilities
Networth (Assets — Liabilities) =	

Report

(It's the last week of the month. How much have you met your target? ____ %)

How much *financial progress* have you made *compared* to previous months?

Passive	Active Income
	Salary: Deals: Business: Gifts
Unbudgeted (10% of Budgeted)	**Budgeted Expenses**

Monthly Cash Flow (escrow savings) =

Assets	Liabilities

Networth (Assets — Liabilities) =

Fin. Statement/Targets for _____

(It's the last day of a new month. What are your income & cash flow targets for next month?

Which month do you plan to acquire your first asset this year?

Passive	Active Income
	Salary: Deals: Business: Gifts
Unbudgeted	**Budgeted Expenses**
(10% of Budgeted)	
Monthly Cash Flow (escrow savings) =	

Assets	Liabilities
Networth (Assets — Liabilities) =	

Report

(It's the last week of the month. How much have you met your target? ____ %)

How much *financial progress* have you made *compared* to previous months?

Passive	Active Income
	Salary: Deals: Business: Gifts
Unbudgeted	**Budgeted Expenses**
(10% of Budgeted)	
Monthly Cash Flow (escrow savings) =	

Assets	Liabilities
Networth (Assets — Liabilities) =	

Financial Statement for _____

(It's day #1 of a new month. What are your targets? Both for income & cash flow?)

If you don't have a book where you track your progress throughout the year, your goal for the year is probably not clear yet.

Passive	Active Income
	Salary: Deals: Business: Gifts
Unbudgeted (10% of Budgeted)	**Budgeted Expenses**

focus on ***escrow****, then acquire* ***assets***

Monthly Cash Flow (escrow savings) =

Assets	Liabilities

Networth (Assets — Liabilities) =

Report

(It's the last week of the month. How much have you met your target? ____ %)

How much *financial progress* have you made *compared* to previous months?

Passive	Active Income
	Salary: Deals: Business: Gifts
Unbudgeted	**Budgeted Expenses**
(10% of Budgeted)	
Monthly Cash Flow (escrow savings) =	

Assets	Liabilities
Networth (Assets — Liabilities) =	

Statement/Target for _____

(It's day #1 of a new month. What are your targets? Both for income & cash flow?)

Aim to have cash flow every week. What will it be by month end?

Passive	Active Income
	Salary: Deals: Business: Gifts
Unbudgeted	**Budgeted Expenses**
(10% of Budgeted)	
Monthly Cash Flow (escrow savings) =	

Assets	Liabilities
Networth (Assets — Liabilities) =	

Report

(It's the last week of the month. How much have you met your target? ____ %)

How much *financial progress* have you made *compared* to previous months?

Passive	Active Income
	Salary: Deals: Business: Gifts
Unbudgeted	**Budgeted Expenses**
(10% of Budgeted)	
Monthly Cash Flow (escrow savings) =	

Assets	Liabilities
Networth (Assets — Liabilities) =	

Financial Statement for _____

(It's day #1 of a new month. What are your targets? Both for income & cash flow?)

Aim to have cash flow every week. What will it be by month end?
Remember from Chapter 3, *"cash flow must go into escrow account"*.

Passive	Active Income
	Salary: Deals: Business: Gifts
Unbudgeted	**Budgeted Expenses**
(10% of Budgeted)	
Monthly Cash Flow (escrow savings) =	

Assets	Liabilities
Networth (Assets — Liabilities) =	

Report

Stating Requires Strength, Continuing is Easy!

The energy it takes to *start running* is more than the energy it takes to *continue running*. Making your first million is the hardest, but once you put your energies into ensuring you make the first one, it becomes easy to acquire several other millions. Earning your first passive income could be the most difficult; but once you make your first, it becomes easy to make many others.

Success Cycle

There is a *Success Cycle*. It's a *motivation cycle*. Once you succeed in one thing, your motivation and belief system goes up! Once you acquire your first *passive-income generating asset*, it'll be easy for you to acquire several others. So acquire the first!

Again, Let's Review What You've Accomplished…

1. **You know where you are financially:** both via your financial snapshot and the 9 stages towards financial freedom
2. **You've created your Freedom goal.** And it's placed where you can always see it (e.g. a vision board). ✓
3. **You're making financial progress.** via writing your financially statement weekly/monthly, ensuring *cash flow is positive,* and moving up the 9 stages. ✓
4. **Escrow is growing/yielding!** You are increasing the streams of your income. So, your cash reserves *(cash asset)* is growing weekly/monthly (and yielding dividends while you're still saving). And it's getting bigger for the purpose of acquiring *passive-income generating assets*. ✓
5. **You are acquiring assetsr.** Your ensuring that your business buys your assets. ✓

ONE MORE THING...

FINAL WORDS

Recommended books

Money Won't Make You Rich

God does not expect us to spend our income. He expects us only to spend the YIELD from the INVESTMENTS we make with our income! (Luke 19)

Get this right: If you will do more work on yourself, your character and your inner man, then you will get to a place where you are absolutely content and satisfied with God's blessing with your life. What is worth spending your life attaining is *righteousness and contentment*—which is true wealth. (And God finds it easier to trust you with more wealth and money because your heart is right).
